

Abfrontier, our specialized antibody brand of Young In Frontier,

is a supplier of catalog & custom antibodies, ELISA kits and protein related products manufactured by our research center in South Korea.

AbFrontier has an innovative research center with highly qualified research team and animal facility with 500 mice in SPF zone, 3,500 rabbit and 20 goat cages. And the quality of all products is strictly controlled by ISO9001:2008. Based on these, it is easy to understand customer's needs and provide products accordingly.

Since the establishment in 1994, we have developed and produced primary antibodies, ELISA kits and proteins for various applications in many research fields. In particular, antibodies in ROS (Reactive oxygen species), and Cell signaling are highly evaluated by many researchers in the world, such as Sod, Prx and Gpx. With the top quality antibody production technology, we produce the best quality sandwich ELISA kit using the optimized antibody pairs and we have realized the high accuracy and excellent sensitivity in ELISA kit. Regarding ELISA kit, we have also started producing Cytokine ELISA kit, named Cymax™, by demand of our loyal customers.

We supply

- Catalog Antibodies
- Sandwich ELISA Kits
- Recombinant Proteins
- Western Blot Detection Reagents

We provide

- Quality of Products and Datasheet
- Fast Delivery
- Customer Friendly
- 100% Quality Guarantee

Cymax™
