## Influenza A virus - Matrix Antibody (biotin)

CATALOG NUMBER: 35-280

SPECIES REACTIVITY: Virus  SESTED APPLICATIONS: WB  SESTED APPLICATIONS: Optimal dilutions for each application to be determined by the researcher.  SPECIFICITY: Specific to purified matrix protein (M)  MMUNOGEN: Influenza A, Phillipines (H3N2)  SOST SPECIES: Goat  Properties  URIFICATION: Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild conditions to give a high degree of substitution.
ISER NOTE: Optimal dilutions for each application to be determined by the researcher.  IPECIFICITY: Specific to purified matrix protein (M)  IMMUNOGEN: Influenza A, Phillipines (H3N2)  IOST SPECIES: Goat  Properties  FURIFICATION: Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
SER NOTE: Optimal dilutions for each application to be determined by the researcher.  Specific to purified matrix protein (M)  MMUNOGEN: Influenza A, Phillipines (H3N2)  IOST SPECIES: Goat  Properties  URIFICATION: Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
PECIFICITY: Specific to purified matrix protein (M)  MMUNOGEN: Influenza A, Phillipines (H3N2)  IOST SPECIES: Goat  Properties  URIFICATION: Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
MMUNOGEN: Influenza A, Phillipines (H3N2)  IOST SPECIES: Goat  Properties  URIFICATION: Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
OST SPECIES:  Goat  Properties  Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
Properties PURIFICATION: Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
Purified IgG fraction of antiserum covalently coupled with the N-Hydroxysuccinimide ester of biotin under mild
,,,,,,,,,,,,,,,,,,,,,,,,,,,
HYSICAL STATE: Liquid
Influenza A virus - Matrix antibody is in a phosphate saline buffer (0.01M, pH 7.2) containing 0.1% sodium azide preservative. No stabilizing proteins have been added.
TORAGE CONDITIONS: Influenza A virus - Matrix antibody can be stored at -20°C, stable for one year.
CLONALITY: Polyclonal
CONJUGATE: Biotin
additional Info
Additional Info Anti-Influenza A virus - Matrix Biotin conjugate
