

Abgent, a WuXi AppTec company, is a leading manufacturer of primary antibodies with more than a decade of experience. We meet the ever changing demands of research and drug discovery through a thoughtful target selection process and strengthened validation-standards. Moreover, we strive to continuously improve the customer experience through comprehensive technical support, a world class website, an easy ordering process.

CROWN ANTIBODIES

Crown antibodies pass additional stringent quality requirements, including extended control sets, uniform results against multiple biologically relevant cell lines and tissues, and function in multiple applications.

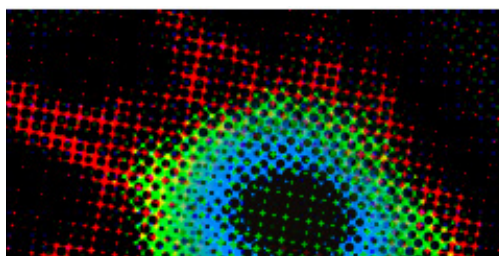

PRIMARY ANTIBODIES

- Cancer
- Cardiovascular
- Cell Biology
- Developmental Biology
- Immunology
- Microbiology
- Neuroscience
- Signal Transduction
- Stem Cells

SECONDARY ANTIBODIES

- Agarose
- Alkaline Phosphatase (Calf Intestine)
- Allophycocyanine
- ATTO
- Biotin
- Fluorescein (FITC)
- Peroxidase (Horseradish)
- R-Phycoerythrin (RPE)
- Rhodamine (TRITC)
- Texas Red®
- Unconjugated

ANTIBODIES COLLECTION

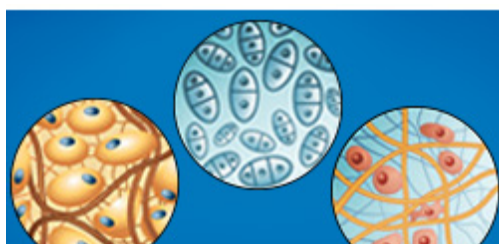

- Amyotrophic Lateral Sclerosis (ALS)
- Autophagy
- Goat Antibodies
- GPCR Antibodies
- Infectious Disease and Small Molecules
- Loading Control
- Phospho Antibodies
- Tag Antibodies
- Zebrafish
- Stem Cells

PEPTIDES

Abgent offers custom and catalog peptides to pharmaceutical, biotechnology companies and academic institutions worldwide.

- Synthetic Peptides
- Blocking Peptides

CELLS/TISSUES/LYSATES

Abgent offers a variety of tissue extracts, whole cell lysates and over-expression lysates.

- Tissue Selections
- Cell & Tissue Lysates
- Over-Expression Lysates
