r-Cytochrome c Polyclonal Antibody

CATALOG #: 3352-100

AMOUNT: 100 µg

LOT #: _____

HOST: Rabbit

IMMUNOGEN: Rat cytochrome c

SPECIES REACTIVITY: Rat

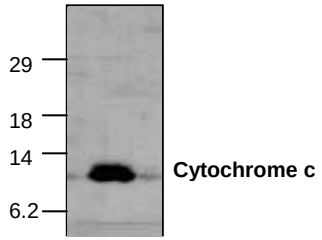

FORMULATION:
100 µg (0.2 mg/ml) affinity purified rabbit anti-Cytochrome c polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:
Store at -20˚C. For long-term storage, aliquot and freeze at -70˚C. Avoid repeated freeze/defrost cycles.

BACKGROUND:
Cytochrome c (m.w. 12,500) is an electron transport protein from mitochondria. It is released from mitochondria to cytoplasm during the early stages of apoptosis, prior to caspase activation, DNA fragmentation, and loss of membrane potential. The cytoplasmic cytochrome c is associated with Apaf-1 and caspase-9 to activate caspase-3 and other caspases.

SPECIFICITY:
The cytochrome c antibody detects the 12 kDa cytochrome c from rat samples.

APPLICATION AND USAGE:
The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Rat kidney lysate (Cat.# 2702-100) can be used as a positive control. Blocking peptide for this antibody is also available (Cat.# 3352-50BP).

Cat.# 3352-100
Western blot analysis of cytochrome c expression in rat kidney tissue lysate.

FOR RESEARCH USE ONLY! Not to be used on humans.
