

NBL1-16869**TGN38 Overexpression Lysate****Unit Size**

0.1 mg

Storage

Store at -80C. Avoid freeze-thaw cycles.

Applications

WB

Molecular Weight

45.7kDa

Purity

Protein

Marker

Golgi Apparatus Marker

Specificity/Sensitivity

Homo sapiens trans-golgi network protein 2 (TGOLN2), mRNA.

Immunogen

The lysate was created in HEK293T cells, using plasmid ID RC203323 and based on accession number NM_006464. The protein contains a C-terminal DDK tag.

Recommended Dilutions

Western Blot

Buffer

RIPA buffer

Uses

This product is intended for use as a positive control in Western Blot. You will receive the lysate (100ug), and an empty vector negative control (100 ug).

Images

Western Blot: TGN38 Overexpression Lysate (Adult Normal) [NBL1-16869] Left-Empty vector transfected control cell lysate (HEK293 cell lysate); Right -Over-expression Lysate for TGN38.

**Notes**

This product is manufactured by and sold under license from OriGene Technologies and its use is limited solely for research purposes. Please note that "1 mg/ml" refers to the total protein concentration and that the specific protein concentration is not determined at this time.

Updated 3/9/2013 2.0

Limitations: This product is for research use only and is not approved for use in humans or in clinical diagnosis. Products are guaranteed for six months from the date of receipt except for peptides and proteins which are guaranteed for 3 months. **For more information on our guarantee, please visit www.novusbio.com/guarantee.**
