SECTION 4: First aid measures

General information
When in doubt or if symptoms are observed, get medical advice. If unconscious place in recovery position and seek medical advice. Never give anything by mouth to an unconscious person or a person with cramps. Change contaminated, saturated clothing. Do not leave affected person unattended.

After inhalation
Remove casualty to fresh air and keep warm and at rest. If breathing is irregular or stopped, administer artificial respiration. In case of respiratory tract irritation, consult a physician.

In case of skin contact
After contact with skin, wash immediately with plenty of water and soap. Remove contaminated, saturated clothing immediately. In case of skin reactions, consult a physician.

After eye contact
In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist. Protect uninjured eye. Remove contact lenses, if present and easy to do. Continue rinsing.

In case of ingestion
If accidentally swallowed rinse the mouth with plenty of water (only if the person is conscious) and obtain immediate medical attention. Do NOT induce vomiting. Give nothing to eat or drink.

Most important symptoms and effects, both acute and delayed
No data available

Indication of any immediate medical attention and special treatment needed
No data available

Self-protection of the first aider
First aider: Pay attention to self-protection!

Information to physician
No data available
SECTION 5: Firefighting measures

Extinguishing media
Suitable extinguishing media
The product itself does not burn. Co-ordinate fire-fighting measures to the fire surroundings.

Extinguishing media which must not be used for safety reasons
No restriction

Special hazards arising from the substance or mixture
In case of fire may be liberated: Pyrolysis products, toxic

Advice for firefighters
DO NOT fight fire when fire reaches explosives. In case of fire: Wear self-contained breathing apparatus.

Additional information
Do not allow run-off from fire-fighting to enter drains or water courses. Do not inhale explosion and combustion gases. Use caution when applying carbon dioxide in confined spaces. Carbon dioxide can displace oxygen. Use water spray jet to protect personnel and to cool endangered containers.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures
In case of major fire and large quantities: Remove persons to safety.

Environmental precautions
Discharge into the environment must be avoided.

Methods and material for containment and cleaning up
Spilled product must never be returned to the original container for recycling. Collect in closed and suitable containers for disposal.

Additional information
Clear spills immediately.

SECTION 7: Handling and storage

Precautions for safe handling
All work processes must always be designed so that the following is as low as possible: Inhalation skin contact Eye contact

Conditions for safe storage, including any incompatibilities
storage temperature: 15-25 °C
Storage class: 8B
Keep in a cool, well-ventilated place.

Specific end use(s)

Exposure controls

Appropriate engineering controls
Technical measures and the application of suitable work processes have priority over personal protection equipment. If
handled uncovered, arrangements with local exhaust ventilation have to be used.

Personal protection equipment
Wear suitable protective clothing. When handling with chemical substances, protective clothing with CE-labels including the
four control digits must be worn. For the protection against direct skin contact, body protective clothing is essential (in
addition to the usual working clothes).

Eye/face protection
Eye glasses with side protection DIN-/EN-Norms: DIN EN 166
Recommendation: VWR 111-0432

Skin protection
When handling with chemical substances, protective gloves must be worn with the CE-label including the four control digits.
Recommended glove articles DIN-/EN-Norms: DIN EN 374 In the case of wanting to use the gloves again, clean them before
taking off and air them well.

By short-term hand contact
Suitable material: CR (polychloroprene, chloroprene rubber)
Thickness of the glove material: 0,13 mm
Breakthrough time (maximum wearing time): 101 min
Recommended glove articles: VWR 112-0032

By long-term hand contact
Suitable material: CR (polychloroprene, chloroprene rubber)
Thickness of the glove material: -
Breakthrough time (maximum wearing time): > 480 min
Recommended glove articles: VWR 112-2157

Respiratory protection
Usually no personal respirative protection necessary. Suitable respiratory protection apparatus:

Recommendation: no data available

Additional information
Wash hands before breaks and after work. Avoid contact with skin and eyes. When using do not eat, drink or smoke. Provide
eye shower and label its location conspicuously.
