# **GJA1 Antibody**

CATALOG NUMBER: 48-409

**GENE ID:** 

2697

Immunohistochemistry staining of GJA1 in testis, seminiferous tubules and leydig cells using GJA1 Antibody.

Specifications	
SPECIES REACTIVITY:	Bovine, Dog, Gibbon, Gorilla, Guinea Pig, Hamster, Human, Monkey, Mouse, Pig, Rat
TESTED APPLICATIONS:	IHC
APPLICATIONS:	GJA1 antibody can be used in ELISA, Western Blot starting at 1 - 2 ug/mL, immunohistochemistry starting at 10 ug/mL, immunocytochemistry, immunoprecipitation starting at 1 - 2 ug/mL, and flow cytometry starting at 1 - 2 ug/mL.
USER NOTE:	Optimal dilutions for each application to be determined by the researcher.
SPECIFICITY:	BLAST analysis of the peptide immunogen showed no homology with other human proteins.
IMMUNOGEN:	GJA1 antibody was raised against a peptide located in the C-Terminal domain of GJA1 (Human).
HOST SPECIES:	Rabbit
Properties	
PURIFICATION:	Immunoaffinity Chromatography
PHYSICAL STATE:	Liquid
BUFFER:	PBS, 0.1% sodium azide.
STORAGE CONDITIONS:	GJA1 antibody should be stored long term (months) at -80 °C and short term (days) at 4 °C. As with all antibodies avoid freeze/thaw cycles.
CLONALITY:	Polyclonal
CONJUGATE:	Unconjugated
Additional Info	
ALTERNATE NAMES:	GJA1, Connexin-43, DFNB38, Connexin 43, Gap junction alpha-1 protein, GJAL, HSS, Gap junction protein alpha 1, ODDD, ODD, AVSD3, CX43, HLHS1, ODOD, SDTY3
ACCESSION NO.:	P17302
PROTEIN GI NO.:	117706
OFFICIAL SYMBOL:	GJA1

## **Background**

### **BACKGROUND:**

Gap junction protein, alpha 1 is a member of the connexin gene family and a component of gap junctions. Gap junctions are composed of arrays of intercellular channels and provide a route for the diffusion of materials of low molecular weight from cell to cell. Connexin 43 is the major protein of gap junctions in the heart, and gap junctions are thought to have a crucial role in the synchronized contraction of the heart and in embryonic development. Connexin 43 is targeted by several protein kinases that regulate myocardial cell-cell coupling. A related intronless connexin 43 pseudogene, GJA1P, has been mapped to chromosome 5.

### FOR RESEARCH USE ONLY
