VWR recycling solutions

Comprehensive recycling solutions and sustainable business practices to support your sustainability goals.
Recycling solutions

Waste generation is a global challenge. To address this issue, we offer a variety of innovative recycling and tack-back solutions.

Alongside our customers, we work to minimize waste creation by diverting materials into usable streams, rather than sending them to a landfill.

Through collaboration and creativity, waste can be given new life.

### VWR® GARMENT RECYCLING SOLUTION

This easy-to-use recycling program provides a complete waste collection, shipment, and recycling solution for used disposable apparel. The plastic waste is recycled into resin that is used to make permanent infrastructure including composite decking, railroad ties, and drainage pipes.
