Sterile 70% Isopropanol
Convenient trigger spray

Description
Sterile 70% Isopropanol contains 70% by volume USP-grade Isopropanol (isopropyl alcohol) and 30% USP-purified water. This solution is submicron filtered, filled into cleaned containers, double-bagged and gamma-irradiated. Each bottle is lot coded with an expiration date for easy recordkeeping.

Non-atomizing adjustable spray
Customers can choose a stream delivery for precise application or the coarse spray to apply solution to larger areas. This is a fully assembled, ready-to-use applicator/container; no unpacking, handling or attachment of a separate spray head is required.

Features
- Made with USP-grade Isopropanol
- Filtered through 0.2 micron filter
- Gamma-irradiated to a sterility level of 10^-6 with independent QC audits to ensure sterility
- Double-bagged in solvent-safe bags
- Non-atomizing adjustable spray
- Fully assembled, ready to use applicator/container
- Each bottle includes a set of 5 color indicator dots for easy identification
- Lot traceable
- Each lot tested for endotoxins
- Lot-specific information on each shipment simplifies recordkeeping:
  » Certificate of Processing confirming radiation dosage
  » Certificates of Compliance and Analysis
  » Expiration date marked on each package

Benefits
- Removes many surface contaminants
- Evaporates and leaves extremely low residues
- Prefiltered and sterilized for pass through and use in critical environments
- Eliminates mixing, filtration, sterilization, processing and QC expense of in-house production of sterile alcohol/water blends
- Ready to use sprayer eliminates handling and assembly of sprayhead and maintains sterility
- Meets FDA guideline for medical device bacterial endotoxin limit of not more than 20 EU/device

Applications
- Surface cleaning
- Use on gloved hands in sterile suites
- Wipedown for pass through to controlled environment
- Ideally suited for use with sterile cleanroom wipers
